Preparation devices for medications/solutions

Bag

Brand name	Code	Product	Description	Indication	Quantity box/case
qimospike B	7218.01		qimospike B is an IV fluid bag access spike fitted with qimo ♀.	Aspiration or addition of medication/ fluid from/into an IV fluid bag.	50/600
qimospike B valve	7218.11		qimospike B valve is an IV fluid bag access spike fitted with qimo ♀ and a non-return valve.	Aspiration only from an IV fluid bag, thus avoiding the accidental contamination of the IV solution.	25/450

Vial

Brand name	Code	Product	Description	Indication	Quantity box/case
qimocap ø14	7219.01 7219.010*		qimocap is a vial access cap fitted with qimo ♀. It has been specifically designed to create a permanent connection with the medication vial.	Withdrawal and reconstitution of small volumes of medication in a completely closed environment.	50/900 4/72
qimocap ø20	7219.02 7219.020*				25/450 4/48
qimospike V	7217.04 7217.040*		qimospike V is a vented spike for vials fitted with qimo ♀.	Repeated withdrawals from every type of vial.	25/300 4/48
qimoharpoon	7213.02		qimoharpoon is a closed system transfer device that has an air-intake tube connected to a 50ml balloon filled with sterile air which ensures pressure equalization.	Withdrawal and reconstitution of high-risk medications.	10/80
qimoharpoon S	7213.01				

*Multipack by 25

Syringe/Extension tube

Brand name	Code	Product	Description	Indication	Quantity box/case
qimo ♂	7210.91 7210.910*		qimo ♂ is a disinfectable closed needleless safety connector. It is a safety captive adaptor for male Luer-lock hubs. Once attached, it cannot be disconnected. It connects only to qimo ♀.	To secure all the male Luer-lock fittings.	50/900 4/72
qimotransfer	7220.01		Female Luer-lock to female Luer-lock connector, with qimo ♀ on both ends of the connector.	To transfer medications from syringe to syringe.	50/600

*Multipack by 25

Elastomeric pump - 2 packs available

	Brand name	Code	Product	Description	Indication	Quantity box/case
Option 1	qimoprime, qimo ♂ & qimo ♀	7210.04		Set with qimoprime, qimo ♂ and qimo ♀ in the same packaging.	Can be used to secure the filling port of the elastomeric pump and the distal end of its tubing, but other applications are possible.	50/600
Option 2	qimo ♀	7210.02		qimo ♀ is a multi-purpose, closed, needleless and disinfectable safety connector, supplied in individual packaging.	qimo ♀ can be used to connect the tubing of the distal end of the elastomeric pump secured with qimo ♂, to access an implantable port or any other patient vascular device.	100/1800
	qimoprime & qimo ♂	7210.01		Set supplied with qimo ♂ and qimoprime in the same packaging.	Can be used to secure distal end of elastomeric pump tubing. Need to be connected to a qimo ♀	50/600

Transfer devices for medications/solutions

Bag

Brand name	Code	Product	Description	Indication	Quantity box/case
qimoconnect	7221.01 7221.020*		IV fluid bag extension set with a lateral injection site fitted with qimo ♀. qimo ♂ secures the distal end of the extension tube.	Dilution and administration of all kind of medications.	25/150 10/60
qimoconnect filter	7221.011 7221.0110*		IV fluid bag extension set with a 0.2µm filter and a lateral injection site fitted with qimo ♀. qimo ♂ secures the distal end of the extension tube.	Dilution and administration of solutions which need to be filtered (ex: Paclitaxel).	25/150 10/60
qimoconnect air filter	7221.012 7221.0120*		IV fluid bag extension set with an air-venting filter and a lateral injection site fitted with qimo ♀. qimo ♂ secures the distal end of the extension tube.	Dilution and preparation of foaming solutions, in order to remove the maximum volume of air bubbles (ex: Docetaxel).	25/150 10/60

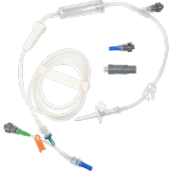

*Multipack by 10 (without qimo ♂)

Infusion devices

Generic products

Brand name	Code	Product	Description	Indication	Quantity box/case
qimopump	7227.101 7227.201 7227.401		qimopump is a safe adaptor for pump infusion sets. This device is fitted with 1, 2 or 4 qimo ♀ connectors, a spike with air-venting port (with a cap) and a universal tube to connect to pump dedicated sets.	To secure the dedicated pump infusion sets and connect the bag containing medication in a safe manner.	25/150
qimo IVset with integral qimooctopus	7229.101 7229.201 7229.401		Intravenous infusion device with spike and drip chamber. It is fitted with 1, 2 or 4 qimo ♀ and qimo ♂ to attach to the male Luer-lock port at the distal end of qimo IVset. qimoprime allows the priming of the line once qimo ♂ has been attached.	To infuse safely medications by gravity or with qimono infusion pump (QIP).	25/150
qimo IVset without qimooctopus	7229.102 7229.202 7229.402				
qimconnect ♀	7221.02		IV fluid bag extension tube with a lateral injection site fitted with qimo ♀ and an air-venting port (with a cap).	Preparation and administration of non toxic drugs (premedication such as antiemetics, corticoids, etc.)	25/150
qimoprime & qimo ♂	7210.01		Set supplied with qimo ♂ and qimoprime in the same packaging.	To secure both the male Luer-lock and the female Luer-lock end of infusion devices.	50/600
qimooctopus	7231.221		qimooctopus is a safe double-lumen IV extension tube allowing continuous infusion, intermittent injection and blood sampling. Its lateral line is fitted with qimo ♀. qimo ♂ has to be attached to the distal end of qimooctopus. qimoprime allows the priming of the line once qimo ♂ has been attached.	Safe emergency access. Easy direct injection with a syringe close to the patient.	50/300

Infusion sets and Qimono Infusion Pump (QIP)

Brand name	Code	Product	Description	Indication	Quantity box/case
Infusion set for gravity or peristaltic pump					
qimo IVset with integral qimo octopus	7229.101 7229.201 7229.401		Intravenous infusion device with spike and drip chamber. It is fitted with 1, 2 or 4 qimo ♀ and qimo ♂ to attach to the male Luer-lock port at the distal end of qimo IVset .	To infuse safely medications by gravity or with qimono infusion pump (QIP).	25/150
qimo IVset without qimo octopus	7229.102 7229.202 7229.402		qimo prime allows the priming of the line once qimo ♂ has been attached.		
Accessory					
qimono infusion pump (QIP)	0VEPQIM FR 0VEPQIMG02 EN PLUG 0VEPQIMC03 NL 0VEPQIMC04 DE 0VEPQIMC06 ES 0VEPQIMC07 PT 0VEPQIMC08 IT 0VEPQIMC10 PL		<p>Infusion Pump : qimono infusion pump is safe, simple to use, precise, silent. 2 set up modes available : Volume & Time of infusion or Flow rate & Volume to infuse.</p> <p>It displays a large coloured screen, visual + audible critical alarms for nurse monitoring & patient safety. It is easy to clean and offers a quick access to the Lithium battery. 2 years warranty (excluding battery).</p>	<p>Qimono Infusion Pump is dedicated to administration of cytotoxic drugs and perfusion in day care hospital.</p> <p>To be used ONLY in conjunction with qimo IVset listed above</p>	1 unit/box

Patient's vascular access

Brand name	Code	Product	Description	Indication	Quantity box/case
qimoperfusafe	7242.720 7242.725 7242.920 7242.925		qimoperfusafe is a safety infusion set with Huber needle fitted with a qimo ♀ to access implantable ports.	Safety device (protected needle and closed system connector) to puncture an implantable port.	10/90
qimo ♀	7210.02		qimo ♀ is a multi-purpose, closed, needleless and disinfectable safety connector.	To connect to any other vascular access, Huber needles, CVC...safely and with a closed system	100/1800
qimoflow+	VPE741507 (22G – 15 mm) VPE741707 (22G – 17 mm) VPE742007 (22G – 20 mm) VPE742507 (22G – 25 mm) VPE743007 (22G – 30 mm) VPE743507 (22G – 35 mm) VPE741509 (20G – 15 mm) VPE741709 (20G – 17 mm) VPE742009 (20G – 20 mm) VPE742509 (20G – 25 mm) VPE743009 (20G – 30 mm) VPE743509 (20G – 35 mm) VPE741511 (19G – 15 mm) VPE741711 (19G – 17 mm) VPE742011 (19G – 20 mm) VPE742511 (19G – 25 mm) VPE743011 (19G – 30 mm) VPE743511 (19G – 35 mm)		Safety huber needle with extension tube and safety adaptor: qimo ♀ (closed system) qimoflow+ is a single-handed activation needle allowing an automatic positive flush during removal	qimoflow+ safety Huber needles are indicated for the administration or withdrawal of fluids through implantable ports.	12/30
